

In option.tsx Option is the (1)
default export, Option is then imported into
'base/components/radio-control/index.tsx'
as "import RadioControlOption from './option';"
Once it's in 'radio-control/index.tsx' it is
modified and then changed again to the export
"export { default as RadioControlOption } from './option'"

And then it goes into Shipping Rates Control Package and then into
Shipping Rates Control. (2)
